---

The authors wish to make the following correction to their paper [1]. In the discussion section, the sentence “Regarding the lipid profile, the present results revealed a significant increase ( $p < 0.001$ ) in the serum levels of cholesterol, triglycerides and HDL-cholesterol in all diabetics relative to all non-diabetic subjects”. This should be changed to “Regarding the lipid profile, the present results revealed a significant increase ( $p < 0.001$ ) in the serum levels of cholesterol and triglycerides and a significant decrease in HDL-cholesterol in all diabetics relative to all non-diabetic subjects”.

The authors would like to apologize for any inconvenience caused to the readers by these changes. The manuscript will be updated and the original will remain online on the article webpage.
