Kurata, T. and Yamamoto, K.T. *petit1*, a Conditional Growth Mutant of Arabidopsis Defective in Sucrose-Dependent Elongation Growth.

In Table II printed on p. 800, the unit for DCMU was printed inaccurately in the legend. The entire table with the correction is printed below.

 Table II.
 Effects of continuous green light on hypocotyl length in the absence of Suc

Seedlings were initially grown under continuous white light (43 W m⁻²) for 24 h and were then grown in the dark or in dim white light (0.42 W m⁻²) or green light (3.8 W m⁻²) for 5 d at 22°C in the presence (+DCMU) or absence (-DCMU) of 1 μ M DCMU.

Genotype	-DCMU			+DCMU		
	Dark	Dim white	Green	Dark	Dim white	Green

Wild type	13.0 ± 1.0	3.2 ± 0.5	4.7 ± 0.8^{a}	12.9 ± 1.0	3.1 ± 0.6	3.1 ± 0.4
