HBL1* Is a Human Long Noncoding RNA that Modulates Cardiomyocyte Development from Pluripotent Stem Cells by Counteracting *MIR1

Juli Liu, Yang Li, Bo Lin, Yi Sheng, and Lei Yang*

(Developmental Cell 42, 333–348; August 21, 2017)

In the originally published version of this article, the authors did not include the NCBI GenBank accession numbers for four *HBL1* transcripts deriving from the human gene *HBL1* identified in this paper. This information is included below and has now been added to the article online. The authors regret this omission and apologize for any inconvenience it may have caused.

GenBank: MF678489 (Seq1 [HBL1-T1])

GenBank: MF678490 (Seq2 [HBL1-T2])

GenBank: MF678491 (Seq3 [HBL1-T3])

GenBank: MF678492 (Seq4 [HBL1-T4])
