Cell Host Microbe. 2017 December 13; 22(6): 830. doi:10.1016/j.chom.2017.11.010.

Posttranscriptional m⁶A Editing of HIV-1 mRNAs Enhances Viral Gene Expression

Edward M. Kennedy, Hal P. Bogerd, Anand V.R. Kornepati, Dong Kang, Delta Ghoshal, Joy B. Marshall, Brigid C. Poling, Kevin Tsai, Nandan S. Gokhale, Stacy M. Horner, and Bryan R. Cullen*

(Cell Host & Microbe 19, 675–685; May 11, 2016)

In this article, the contributions made by N.S.G. and S.M.H. were not adequately captured in the Author Contributions, and S.M.H.'s sources of research support were not mentioned in the Acknowledgments. Therefore, those sections have been updated and are included here. The authors apologize for any inconvenience this may have caused.

Acknowledgments

This research was supported by NIH grant R01-AI117780 to B.R.C. K.T. was supported by NIH grant T32-CA009111. S.M.H. was supported by the Duke University Center for AIDS Research, an NIH-funded program (5P30 AI064518), and a Duke School of Medicine Whitehead Scholarship.

AUTHOR CONTRIBUTIONS

E.M.K. and B.R.C. designed experiments, analyzed the data, and wrote the manuscript. E.M.K., H.P.B., A.V.R.K., D.K., D.G., B.C.P., J.M.B., and K.T. performed the experiments. N.S.G. and S.M.H. provided reagents, contributed significant intellectual insights to the initial experimental and conceptual framework, and edited the manuscript.
