Tumor Evolution of Glioma-Intrinsic Gene Expression Subtypes Associates with Immunological Changes in the Microenvironment

Qianghu Wang, Baoli Hu, Xin Hu, Hoon Kim, Massimo Squatrito, Lisa Scarpace, Ana C. deCarvalho, Sali Lyu, Pengping Li, Yan Li, Floris Barthel, Hee Jin Cho, Yu-Hsi Lin, Nikunj Satani, Emmanuel Martinez-Ledesma, Siyuan Zheng, Edward Chang, Charles-Etienne Gabriel Sauv , Adriana Olar, Zheng D. Lan, Gaetano Finocchiaro, Joanna J. Phillips, Mitchel S. Berger, Konrad R. Gabrusiewicz, Guocan Wang, Eskil Eskilsson, Jian Hu, Tom Mikkelsen, Ronald A. DePinho, Florian Muller, Amy B. Heimberger, Erik P. Sulman*, Do-Hyun Nam*, and Roel G.W. Verhaak*

In the originally published version of this paper's Supplemental Information, incorrect headers were used for the gene signatures listed in Table S1. Specifically, the headers of the Proneural and the Mesenchymal gene signatures were swapped.

To provide clarity, the authors are supplying a revised Table S1, which has been corrected in the online version of this article. This change does not alter the main text or the conclusions of the work. The authors apologize for any confusion this may have caused.
