Inter-chromosomal Contact Properties in Live-Cell Imaging and in Hi-C

Philipp G. Maass, A. Rasim Barutcu, Catherine L. Weiner, and John L. Rinn*

In the originally published version of this article, there was a labeling mistake in Figure S1A. The nucleus in Figure S1A is the same shown in Figure 1A, depicting CLING signals of *FIRRE* and *DXZ4*. In the original version of Figure S1A, the label stated *FIRRE-ATF4* and referred to Figure 1B. The mistake occurred during the review process. Initially, we selected a nucleus with *FIRRE* and *ATF4* CLING signals to describe the stepwise image processing approach. We then exchanged these images (*FIRRE-AFT4*) and used the nucleus shown first in main Figure 1A (*FIRRE-DXZ4*) without exchanging the labels. This labeling error does not change any of the conclusions of the article, and the authors apologize for any confusion.
