

Strain-dependency of Chromosomal Abnormalities in Lymphomas Developed in E μ -myc Transgenic Mice

We previously reported the chromosomal abnormalities in lymphomas developed in E μ -myc transgenic mice (K. Akagi *et al.*, *Jpn. J. Cancer Res.*, Vol. 92, No. 5 pp. 499–505, 2001). However, some chromosomes in Figs. 1, 2 and 3 were not identified correctly. The authors therefore wish to retract the article and to suspend judgment regarding the conclusions while all karyotypes are reconfirmed.
