

Retraction for Zehorai and Seger, “Beta-Like Importins Mediate the Nuclear Translocation of Mitogen-Activated Protein Kinases”

Eldar Zehorai, Rony Seger

Department of Biological Regulation, The Weizmann Institute of Science, Rehovot, Israel

Volume 34, no. 2, p. 259–270, 2014, <https://doi.org/10.1128/MCB.00799-13>. We retract this article. After a recent correction of some figures (E. Zehorai and R. Seger, *Mol Cell Biol* 37:e00215-17, 2017, <https://doi.org/10.1128/MCB.00215-17>), we were made aware of additional problems, including an extra lane in the gERK panel of Fig. 1C and inappropriate splicing in Fig. 8A. Although these errors do not change the conclusions derived from these figures, we choose to retract this paper in the interest of maintaining accuracy in the published scientific literature. We apologize for these mistakes and any inconvenience they caused.
