Retraction: Genome-Wide Association Study Identifies Common Genetic Variants Associated With Salivary Gland Carcinoma and its Subtypes by Xu L, Tang H, Chen DW, El-Naggar AK, Wei P, Sturgis EM

Xu L, Tang H, Chen DW, El-Naggar AK, Wei P, Sturgis EM. Genome-wide association study identifies common genetic variants associated with salivary gland carcinoma and its subtypes. *Cancer* 2015 Jul 15;121(14):2367–74. doi:10.1002/cncr.29381.

The above article, published in Wiley Online Library (wileyonlinelibrary.com) on 30 March 2015, has been retracted by agreement of the authors; the journal Editor-in-Chief, Fadlo R. Khuri; Wiley Periodicals, Inc.; and the American Cancer Society. After this article was published, the authors discovered that, unbeknownst to them, the sampling had been compromised, resulting in duplicate samples involving 93 controls and 4 cases. This led to a change in sample size, statistical power, and some of the results. The authors notified the Editor-in-Chief and respectfully requested that the article be retracted.
