Publisher Correction: TGF- β

concentrations and activity are down-regulated in the aqueous humor of patients with neovascular age-related macular degeneration

Gian Marco Tosi¹, Giovanni Neri¹, Elena Caldi², Fiorella Fusco¹, Tommaso Bacci¹, Antonio Tarantello¹, Elisabetta Nuti¹, Davide Marigliani¹, Stefano Baiocchi¹, Claudio Traversi¹, Marcella Barbarino³, Chiara M. Eandi⁴, Barbara Parolini⁵, Lucia Mundo⁶, Annalisa Santucci², Maurizio Orlandini² & Federico Galvagni² 

Correction to: *Scientific Reports* <https://doi.org/10.1038/s41598-018-26442-0>, published online 23 May 2018

The Article contains errors in the Reference list. The order of References 28 – 35 is incorrect. The correct order of References 28-35 appears below.

28) Saed, G. M., Collins, K. L. & Diamond, M. P. Transforming growth factors beta1, beta2 and beta3 and their receptors are differentially expressed in human peritoneal fibroblasts in response to hypoxia. *Am. J. Reprod. Immunol.* **48**(6), 387-93 (2002).

29) Yafai, Y. *et al.* Müller glial cells inhibit proliferation of retinal endothelial cells via TGF- β 2 and Smad signaling. *Glia* **62**(9), 1476-85 (2014).

30) López-Casillas, F., Payne, H. M., Andres, J. L. & Massagué, J. Betaglycan can act as a dual modulator of TGF-beta access to signaling receptors: mapping of ligand binding and GAG attachment sites. *J. Cell. Biol.* **124**(4), 557-68 (1994).
