

CORRECTION

Correction: Genistein downregulates onco-miR-1260b and upregulates sFRP1 and Smad4 via demethylation and histone modification in prostate cancer cells

Correction to: *British Journal of Cancer* **110**, 1645–1654 (2014); <https://doi.org/10.1038/bjc.2014.48>; published online 6 February 2014

version. The correct version of Fig. 4 with the original pictures for both PC3 miR-NC inh-0h and PC3-miR1260b inh-0h are provided below.

The authors report that there is a mistake in the representative picture of Fig. 4D (top row: PC3-miR1260b inh-0h) in the original

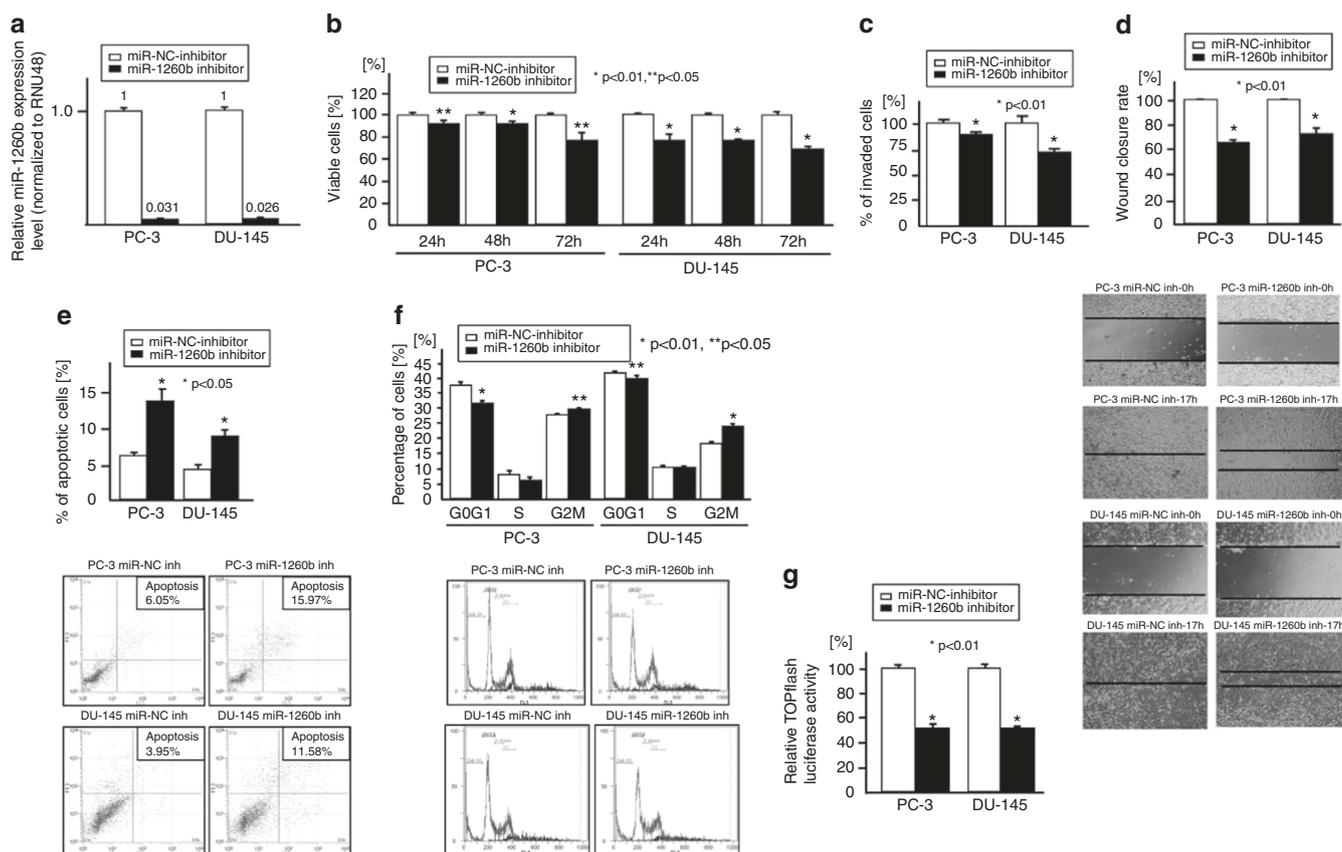

Fig. 4 Effect of miR-1260b knockdown on prostate cancer cells (PC-3, DU-145). Two prostate cancer cell lines (PC-3 and DU-145) were transiently transfected with either miR-1260b inhibitor or miR-negative control (miR-NC inhibitor). **a** Relative miR-1260b expression (miR-NC inhibitor or miR-1260b inhibitor transfected PC cells), **b** cell viability assay (miR-NC inhibitor or miR-1260b inhibitor transfected PC cells), **c** invasion assay, **d** wound healing assay (16–17 h). **e** Apoptosis assay, **f** cell cycle analysis, **g** TCF reporter assay. Error bars represent \pm s.d.
