(Molecular Therapy - Nucleic Acids 3, e159; April 29, 2014)

In the originally published version of this article, the number of cells used in the xenograft model was indicated incorrectly. In the section “Xenograft experiments using nude mice,”  $7 \times 10^5$  A549 lung cancer cells were utilized, not  $7 \times 10^7$  as indicated. The authors apologize for the error and any confusion that may have resulted.
