In “Racial/Ethnic Differences in Expectations Regarding Aging Among Older Adults,” DOI: 10.1093/geront/gnx078, the following sentence included the incorrect measure of perceived support, and therefore the wrong in text citation.

“We used the overall Interpersonal Support Evaluation List score (ISEL; Cohen & Hoberman, 1983) to assess perceived support; one participant did not respond.”

The correct sentence and reference is below:

“We used the overall perceived support score from a scale validated for use with ethnically diverse samples

(Wong, Nordstokke, Gregorich, & Pérez-Stable, 2010); one participant did not respond.”

Wong, S. T., Nordstokke, D., Gregorich, S., & Pérez-Stable, E. J. (2010). Measurement of social support across women from four ethnic groups: Evidence of factorial invariance. *Journal of Cross Cultural Gerontology*, 25, 45–58. doi:10.1007/s10823-010-9111-0

This has now been corrected in the original article.
