

Retraction

Two articles appearing in Volume 47, Number 3, 2017 in *Psychopharmacology Bulletin* were published in error. They are : *Baseline Demographics and Characteristics From a Paliperidone Palmitate Study in Subjects with Recent-Onset Schizophrenia or Schizophreniform Disorder*. Psychopharmacol Bull. 2017 Aug 1;47(3):8–16, and *Correlation of Caregiver Burden and Baseline Characteristics of Caregivers and Patients in Their Care with Recent-Onset Psychosis: The FIRST Study*. Psychopharmacol Bull. 2017 Aug 1;47(3):17–25.

These articles were taken from poster presentations from the 2017 convocation of the American Psychiatric Association. Since the posters were presented at the meeting in an open forum, we mistakenly assumed that the work was available for dissemination. The authors have taken issue with the publications and have requested we withdraw the manuscripts both from Medworks Media (<https://medworksmmedia.com/>) and from the National Library of Medicine. We are in the process of complying with their request to remove the articles.

We regret the error.
