Correction to: Clinical course and prognostic factors of childhood Takayasu's arteritis: over 15-year comprehensive analysis of 101 patients

Luyun Fan¹, Huimin Zhang^{1*}, Jun Cai^{1*}, Lirui Yang², Bin Liu³, Dongmei Wei¹, Jiachen Yu¹, Jiali Fan¹, Lei Song¹, Wenjun Ma¹, Xianliang Zhou¹, Haiying Wu¹ and Ying Lou¹

Correction to: *Arthritis Res Ther*

<https://doi.org/10.1186/s13075-018-1790-x>

Following publication of the original article [1], the authors reported an error. "Angioplasty" in "Imaging modalities" of the "Methods" section should be replaced by "Angiography".

The sentence should read: Angiography was performed in all c-TA patients, including conventional angiography, CTA, and/or magnet resonance angiography (MRA) as the initial diagnostic modality in 36 (35.6%), 57 (56.4%), and 9 (8.9%), respectively, while 28 (27.7%) patients experienced additional catheter-based angiography for interventional therapy after TA diagnosis by CTA (24.7%, $n = 25$) and/or MRA (4%, $n = 4$).
