## Retraction of: **Cardiomyogenesis in the Adult Human Heart**

For the article “Cardiomyogenesis in the Adult Human Heart” (*Circ Res.* 2010;107:305–315; DOI: [10.1161/CIRCRESAHA.110.223024](https://doi.org/10.1161/CIRCRESAHA.110.223024)) by Jan Kajstura, Konrad Urbanek, Shira Perl, Toru Hosoda, Hanqiao Zheng, Barbara Ogórek, João Ferreira-Martins, Polina Goichberg, Carlos Rondon-Clavo, Fumihiro Sanada, Domenico D’Amario, Marcello Rota, Federica del Monte, Donald Orlic, John Tisdale, Annarosa Leri, and Piero Anversa, an investigation by Harvard Medical School and Brigham and Women’s Hospital (BWH) has determined that there were issues with some of the data reported in the article, specifically Figure 1, left and right panels. An expression of concern was published on November 20, 2018,<sup>1</sup> to alert readers that the American Heart Association was communicating with the authors and reviewing the materials provided by BWH. After considering input from authors, the American Heart Association has determined that the best interest of the public and the research community will be served by issuing this notice of retraction.

The American Heart Association, therefore, retracts the article.
