In the article "Baseline Characteristics of Participants in the ASPREE (Aspirin in Reducing Events in the Elderly) Study", values for CES-D-10 score 8+ in Table 3 were incorrect. The original data were for scores of >8 for the CES-D-10. The correct data for CES-D-10 scores of 8+, as numbers and percentages, are 1077 (10%) for 65–74 years, 724 (10%) for 75–84 years, 78 (11%) for (85+ years) and 1879 (10%) for Overall.
