REASON FOR WITHDRAWAL FROM PUBLICATION

This review is out of date, but is correct at the date of publication. The review has been withdrawn from The Cochrane Library, but readers can still access previous versions in the 'Other versions' tab. The original author team is preparing three new protocols which will serve to update and replace this review: Manual treatment and spinal rehabilitative exercise for the prevention of migraine attacks in adults, Manual treatment and spinal rehabilitative exercise for the prevention of TTH in adults, and Manual treatment and spinal rehabilitative exercise for the prevention of cervicogenic headaches in adults. For further information, please contact the PaPaS CRG ([details here](#)).

July 2017

At July 2017, the series of three new reviews intended to replace this review were withdrawn as they were not able to be completed within the available editorial resource.

The editorial group responsible for this previously published document have withdrawn it from publication.

WHAT'S NEW

Date	Event	Description
27 August 2019	Amended	Revised Published notes.

HISTORY

Protocol first published: Issue 1, 2000
