The editorial group responsible for this previously published document have withdrawn it from publication.

REASON FOR WITHDRAWAL

The Abstract and Plain language summary are available in Spanish in Appendix 7.

The authors declare that there is unlikely to be any further studies to be included in this review and so it should be published as a 'stable review'.

At November 2013, the decision was made to withdraw this review and start a new protocol which will comply with current Cochrane standards.

FEEDBACK

Availability of dipyrone in South Africa

Summary

What trade names are used for 'Dipyrone' in South Africa and which companies are distributing it? {SD: Should this be dated?}

Reply

We have referred to: Martindale: The Complete Drug Reference, 32nd Edition, Pharmaceutical Press, London which states that dipyrone is available in South Africa only as a combination drug (Hyoscine butylbromide/dipyrone).

The proprietary preparations are:

Baralgan, Norifortan, Scopex Co (manufactured by Hoechst)

Buscopan (manufactured by Boehringer Ingelheim)

Dipyrone is not listed on the World Health Organisation's 'Essential Drugs List'.
