## Correction: Cost and cost-effectiveness of a parenting programme to prevent violence against adolescents in South Africa

Redfern A, Cluver LD, Casale M, *et al.* Cost and cost-effectiveness of a parenting programme to prevent violence against adolescents in South Africa. *BMJ Global Health* 2019;4:e001147. doi: 10.1136/bmjgh-2018-001147

The author wants to highlight the updated funding statement in this article:

AR was funded to complete this study by the Oxford University Clinical Academic Graduate School Research Elective Bursary. The intervention and randomised controlled trial were supported by the European Research Council (ERC) under the European Union's Seventh Framework Programme (FP7/2007-2013/ERC Grant Agreement No. 313421), Unicef Innocenti Office of Research, Unicef South Africa and the Cambridge Trust. Continuing support is being provided by the ERC under the European Union's Horizon 2020 research and innovation programme (Grant Agreement No. 737476). Additional funding for authors and the research team is provided by Research England, the John Fell Fund (103/757; 161/033), the Leverhulme Trust (PLP-2014-095) and the University of Oxford's ESRC Impact Acceleration Account (1311-KEA-004 and 1602-KEA-189). The South African National Department of Social Development provided in-kind support through posting social workers to be trained as programme facilitators. Various international agencies and governments are supporting ongoing scale-up of the programme. LDC, MC and JIS had full access to all the data in the study. AR had final responsibility for the decision to submit for publication.
