

Correction: In the article “Cellular Localization of Guidance Cues in the Establishment of Retinotectal Topography” (Roger W. Davenport et al.), which appeared on pages 2074–2085 in the March 15, 1996 issue, the authors would like to correct an omission in Figure 2. The lower portion and scale bar of Figure 2, page 2077, inadvertently were missing. The scale bar for this figure (0.2 mm) should have appeared in print as 15.2 mm in length in the lower panel (*E*).
