Korean J Anesthesiol 2019 June 72(3): 221-232

<https://doi.org/10.4097/kja.19049>

The Appendix of this article contained an error throughout in which an incorrect symbol was used for the assignment: it should be <- characters (which is the gets arrow in R), and not ← symbol in the command lines.

For example, the corrected command lines are as below:

```
> N <- 1000
> K <- 3
> (rand <- crPar(N, K))
```

```
Object of class "crPar"
design = CR
N = 500
K = 3
groups = A B C
```

The authors would like to apologize for any inconvenience caused.
