Conducting ethnography in primary care

F Webster and K Rice

Family Practice 2019; 36(4): 523–525. doi:10.1093/fampra/cmz007

This paper has been amended to correct an error on p.523

The following line was corrected from 'highly appropriate' to 'highly inappropriate':

“In most circumstances, however, it would be highly appropriate for the researcher to participate in this dialogue.”

The author apologises for this oversight.
