Volume 4, no. 6, e00536-19, 2019, <https://doi.org/10.1128/mSphere.00536-19>. Fig. 3: An incorrect version of this figure appeared in the published article. The correct figure is shown below.

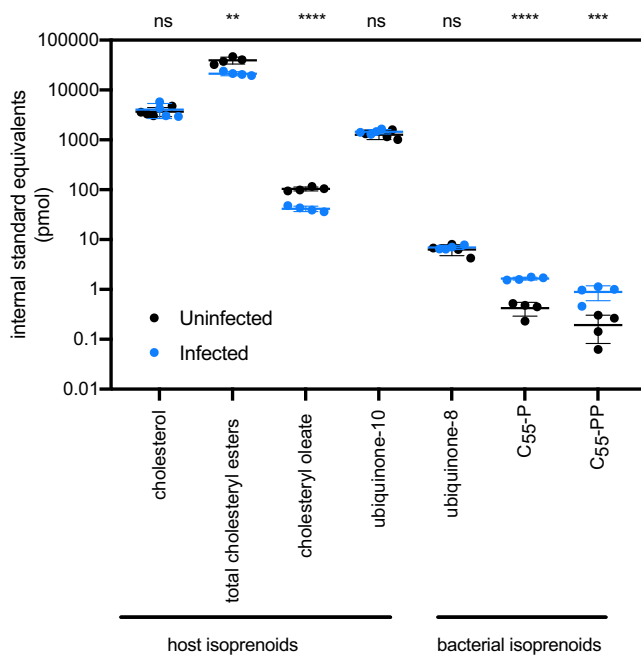

FIG 3 Targeted mass spectrometry of bacterial and host isoprenoids. Shown is a graph of the internal standard equivalent levels of host and bacterial isoprenoids at 4 dpi. Four technical replicates were done. Error bars represent standard deviations. Statistical comparisons were done by an unpaired Student’s *t* test (ns, not significant; **, $P < 0.01$; ***, $P < 0.001$; ****, $P < 0.0001$, for results compared to those with the controls).
