### Corrigendum

In the article by S. He, A. Cuentas-Condori, and D. M. Miller (GENETICS **212**: 387–395) entitled “NATF (Native and Tissue-Specific Fluorescence): A Strategy for Bright, Tissue-Specific GFP Labeling of Native Proteins in *Caenorhabditis elegans*,” in the *Methods* section, on page 388, the previously published plasmid was incorrectly referenced as #60910, Addgene. The misstatement has been corrected as follows: “To create the SEC repair template (pSH55) for the *oig-1* GFP11<sub>x7</sub> CRISPR knock-in, the GFP11<sub>x7</sub> coding sequence was amplified from a previously published plasmid (#70224; Addgene).”
