

## Chest Pain Center Accreditation Is Associated With Improved In-Hospital Outcomes of Acute Myocardial Infarction Patients in China: Findings From the CCC-ACS Project

In the article by Fan et al, “Chest Pain Center Accreditation Is Associated With Improved In-Hospital Outcomes of Acute Myocardial Infarction Patients in China: Findings From the CCC-ACS Project,” which published on October 19, 2019, and appeared in the November 5, 2019 issue of the *Journal (J Am Heart Assoc. 2019;8:e013384. DOI: 10.1161/JAHA.119.013384)*, a correction is needed.

In Figure 3, parts A-D, along the X-axis which indicates “days from accreditation,” the number 355 was incorrect, the result of a typographical error in the label. It has been corrected to read “365.”

The authors regret the error.

The correction has been made to the current online version of the article, which is available here: <https://www.ahajournals.org/doi/10.1161/JAHA.119.013384>
