**Correction: Tyrosine kinase Btk is required for NK cell activation.**

Yan Bao, Jian Zheng, Chaofeng Han, Jing Jin, Huanxing Han, Yinping Liu, Yu-Lung Lau, Wenwei Tu, and Xuetao Cao

The legend for Fig. 6E contained an error. The legend should state “E, 18 h post-poly(I:C) (20  $\mu$ g/g body weight) challenge, liver sections were fixed, embedded, sliced, and then stained with hematoxylin-eosin. Arrows indicate the liver necrosis and infiltration of lymphocytes.” This correction does not affect the results and conclusions of this work.
