**Correction: *Lot1* is a key element of the pituitary adenylate cyclase-activating polypeptide (PACAP)/cyclic AMP pathway that negatively regulates neuronal precursor proliferation.**

Tatiana Fila, Stefania Trazzi, Christophe Crochemore, Renata Bartesaghi, and Elisabetta Ciani

In Fig. 3F, the image corresponding to the  $\beta$ -tubulin III was composed of spliced lanes. An image obtained from an immunoblot where the samples were loaded consecutively is now shown in Fig. 3F. This correction does not affect the results or the conclusions of this work.
