Withdrawal: Restoration of transforming growth factor- β receptor II expression in colon cancer cells with microsatellite instability increases metastatic potential *in vivo*.

Xiao-Qiong Liu, Ashwani Rajput, Liying Geng, Melanie Ongchin, Anathbandhu Chaudhuri, and Jing Wang

This article has been withdrawn by the authors. Part of the AKT immunoblot in Fig. 3A was used as actin in Fig. 1A (*right, HCT116 wt*). The actin immunoblots in Figs. 1B, 3A, and 4E have overlapping lanes. The actin immunoblots in Figs. 4 (A, C, and D) and 5C have overlapping lanes. Figs. 1B, 3A, and 5 (A and C) have undeclared gel splices.
