Zamboni P, Galeotti R, Salvi F, Giaquinta A, Setacci C, Alborino S, Guzzardi G, Sclafani SJ, Maietti E, Veroux P; Brave Dreams Research Group. Effects of venous angioplasty on cerebral lesions in multiple sclerosis: expanded analysis of the Brave Dreams double-blind, sham-controlled randomized trial [Published online ahead of print November 17, 2019]. *J Endovasc Ther*. doi: 10.1177/1526602819890110.

The “Brave Dreams Research Group” was mistakenly listed by the first author; the group author name should be the “Brave Dreams Investigators.” The byline and the appendix have been updated in all versions of the article to reflect this change. In addition, for clarity, the editors have changed the phrase “secondary analysis” to “post hoc analysis” throughout. Lastly, in the *Materials and Methods* section, the subsection *Venogram Classification* has been moved to follow *MRI Protocol and Outcomes*.

The online version now reflects these changes.
