

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

### Corrigendum to “COVID-19 in forensic medicine unit personnel: Observation from Thailand” [J Forensic Legal Med 72 May 2020, 101964]

The authors regret that the article might not have good writing for clarification in the primary text and it might result in misinterpretation. This article is one of the first reports regarding COVID-19 infection and death investigation safety that is an important issue for medical personnel in any Forensic Medicine Unit (last sentence). Regarding the aim of the article, the authors would like to raise a concern for safety protection among practitioners and the authors would like to restate that the authors did not report that there is a scientific confirmation for disease transmission from corpse. The authors did not mean to suggest that the victim had died, and that the authors do not know for sure and cannot scientifically confirm that the virus moved from the dead body. The information about this case was from news reports in Thailand (For example: <https://www.tnnthailand.com/content/32295>; <https://www.thairath.co.th/news/crime/1797189>).

The source of infection might be from any sources. The article should also state that COVID-19 was firstly observed in 2019 in China (first sentence). The authors would like to apologise for any inconvenience caused.
