

RETRACTION: The biological mechanism involved in anticancer properties of amniotic membrane

Camillo Porta

Department of Biomedical Sciences and Human Oncology, University of Bari 'A. Moro', Bari, Italy

To our readers:

With deep regrets, we inform our Readers that the article *The biological mechanism involved in anticancer properties of amniotic membrane* (DOI: <https://doi.org/10.4081/oncol.2020.429>), which has been published in the current issue of *Oncology Reviews* (2020-1), contains verbatim text plagiarized from another paper.¹ The manuscript must be considered as retracted.

On behalf of the Editorial Board of *Oncology Reviews*, I apologize to the Author of the manuscript whose text was plagiarized by *Ameneh Jafari, Hassan Niknejad, Mostafa Rezaei-Tavirani, Caitlin D'Amico, Hakimeh Zali* that this was not picked up in the peer review process. I also apologize to the affected journal for the violation of copyright due to plagiarism.

Unfortunately we were not able to detect it before publication due to the language of the original paper (Slovenian).

Oncology Reviews is uncompromising in its commitment to scientific integrity. When credible evidence of misconduct is brought to our attention, our commitment to the scientific record and to our readership requires immediate notification.

Oncology Reviews is increasingly employing sophisticated software to detect plagiarism. Other journals use similar tools. Authors should be aware that most journals routinely employ plagiarism detection software, and that any plagiarism is likely to be detected.

Camillo Porta,
Editor-in-Chief
Oncology Reviews
