

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

**Correction to
Lancet Psychiatry 2019;
6: 869–76**

Jauhar S, Ratheesh A, Davey C, et al. *The case for improved care and provision of treatment for people with first-episode mania*. *Lancet Psychiatry* 2019; **6**: 869–76—In this Personal View, the penultimate sentence in the Psychological section has been corrected to “The study revealed an increased time to relapse of any mood episode in the CBT group at 15 months (HR 0.37) and improved self-reported recovery.” This correction has been made to the online version as of June 18, 2020.

**Correction to
Lancet Psychiatry 2020;
7: 463**

The Lancet Psychiatry. *Mental health and COVID-19: change the conversation*. *Lancet Psychiatry* 2020; **7**: 463—In this Editorial, MadCovid was described as a social media account; it is in fact a service-user and survivor-led initiative. The text has been edited to reflect this, and a link added. These corrections have been made to the online version as of May 21, 2020.
