

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

Corrigendum

Corrigendum to “Traditional Chinese medicine for COVID-19 treatment” [Pharmacol. Res. 155 (2020) 104743]

Jun-ling Ren, Ai-Hua Zhang, Xi-Jun Wang*

Engineering Research Center of Efficacy Evaluation and Industrial Development of TCM Classic Formulae of the Ministry of Education, National Chinmedomics Research Center, Sino-America Chinmedomics, Technology Collaboration Center, Heilongjiang University of Chinese Medicine, Heping Road 24, Harbin, China

The authors have informed the Journal that in the letter to the Editor referenced above there were some imprecisions that need correction as follows: the sentence “As the serious illness, combined with the patient's performance of damp-heat syndrome, and the heat is more serious than damp, QPD was added for treatment’ should have been ‘As the serious illness, combined with the patient's performance of damp-heat syndrome, and the heat became more serious than damp, QJD (Qingjin Jianghuo Decoction) was added for treatment”

Legend to Fig 1 is modified as follows: Comparison of chest CT results of patients. (a), chest CT on January 24; (b), chest CT on January 28; (c), chest CT on January 30; (d), chest CT on February 4 (reproduced from Reference 7, with permission).

Acknowledgments are modified as follows:

We are grateful for Ms. Yinxing Zhu for providing the CT scans.

The authors apologise for any inconvenience these mistakes may have caused to the readers.

Editorial note:

The Editor has checked the originals of the CT scans and confirms that they are authentic. It was entirely transparent to the journal throughout the editorial process that the authors were not claiming any credit for the content from reference 7. The authors of the CT scans have confirmed their permission for re-publication.
