

## CORRIGENDUM

### **Corrigendum to: Dissociation between frontal and temporal-parietal contributions to connected speech in acute stroke**

Junhua Ding, Randi C. Martin, A. Cris Hamilton and Tatiana T. Schnur. Dissociation between frontal and temporal-parietal contributions to connected speech in acute stroke. *Brain*; 143: 862–876. doi:10.1093/brain/awaa027.

The authors apologize for an error in a range value in the ‘Participants’ section of the Materials and methods. The sentence should read:

To minimize effects of brain-behaviour reorganization, we completed behavioural testing within an average of 4 days after stroke onset (SD = 3; range = 1–13 days).

The authors also apologize for a spelling error in the heading ‘Principal component analysis’.

These have been corrected.
