

Antitumor Effect of a New Nano-Vector with miRNA-135a on Malignant Glioma [Corrigendum]

Liang C, Sun W, He H, et al. *Int J Nanomedicine*. 2018;13:209–220.

The authors apologize for this error and advise it does not affect the results of the paper.

The authors have advised due to an error at the time of figure assembly, Figure 6B on page 217 is incorrect. The correct Figure 6 is shown below.

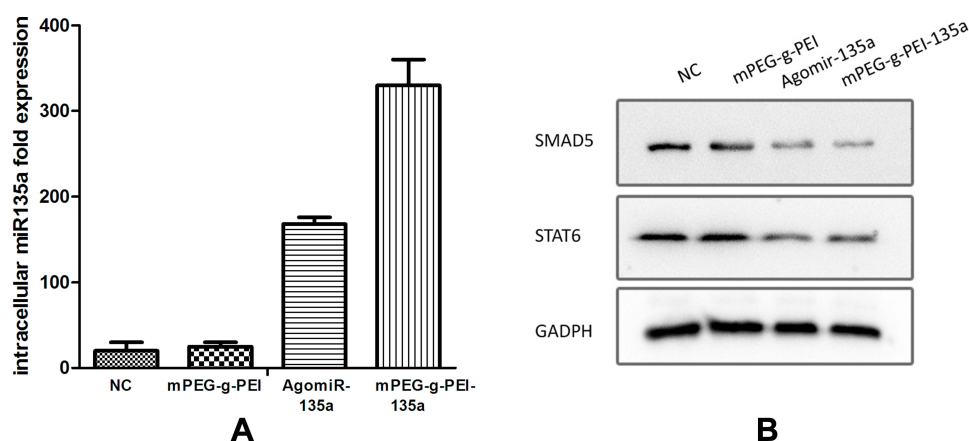

Figure 6 (A) Analysis of miR-135a expression by RT-PCR in different groups (* $P < 0.05$). **(B)** Western blot analysis of the expression of SMAD5 and STAT6 levels in the C6 glioma model of different groups.

Abbreviations: RT-PCR, real-time polymerase chain reaction; mPEG -g-PEI, polyethylene glycol methyl ether grafted polyethylenimine; NC, negative control.

The International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch®, Current Contents®/Clinical Medicine,

Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
