CORRIGENDUM

# (-)-Epigallocatechin-3-Gallate Inhibits eNOS Uncoupling and Alleviates High Glucose-Induced Dysfunction and Apoptosis of Human Umbilical Vein Endothelial Cells by PI3K/AKT/eNOS Pathway [Corrigendum]

Zhang Z, Zhang D. *Diabetes Metab Syndr Obes*. 2020;13:2495—2504.

It has come to the authors attention that the concentration of the used compound EGCG in Figures 1-5 is given in μm (micrometer) where it should be μM (micromolar). The figure legends are correct with μM.

The authors apologize for this error in the figures.
