### Correction to: Canadian Journal of Public Health

<https://doi.org/10.17269/s41997-020-00368-5>

In the section entitled "Responsive and responsible data sharing," the following sentence:

"Institutional research ethics committees, in coordination with institution heads, can agree to a singular multi-site ethics review of an international or international research project to increase efficiency and ensure the consistency of collection and storage practices across research sites" should read

"an interprovincial or international research project" instead of "an international or international research project."

**Publisher's note** Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.
