

Erratum

Erratum: Lakunina et al., “Somatostatin-Expressing Interneurons in the Auditory Cortex Mediate Sustained Suppression by Spectral Surround”

In the article “Somatostatin-Expressing Interneurons in the Auditory Cortex Mediate Sustained Suppression by Spectral Surround,” by Anna A. Lakunina, Matthew B. Nardoci, Yashar Ahmadian, and Santiago Jaramillo, which appeared on pages 3564–3575 of the April 29, 2020 issue, the authors would like to address the following error. Panel **G** in Figure 1 included a brain slice that was not intended to be associated with Figure 1.

The legend for panel **G** of Figure 1 should read as follows: **G**, Coronal brain slice (AP: -2.78 mm) showing different electrode tracks: magenta (DiI) and blue (DiD). Recordings were performed at multiple sites along each penetration. AUDp, Primary auditory area; AUDd, dorsal auditory area, according to Allen Mouse Brain Atlas.

This correction does not affect the interpretation or conclusions of the article. The correct Figure 1 appears below. The online version has been corrected.

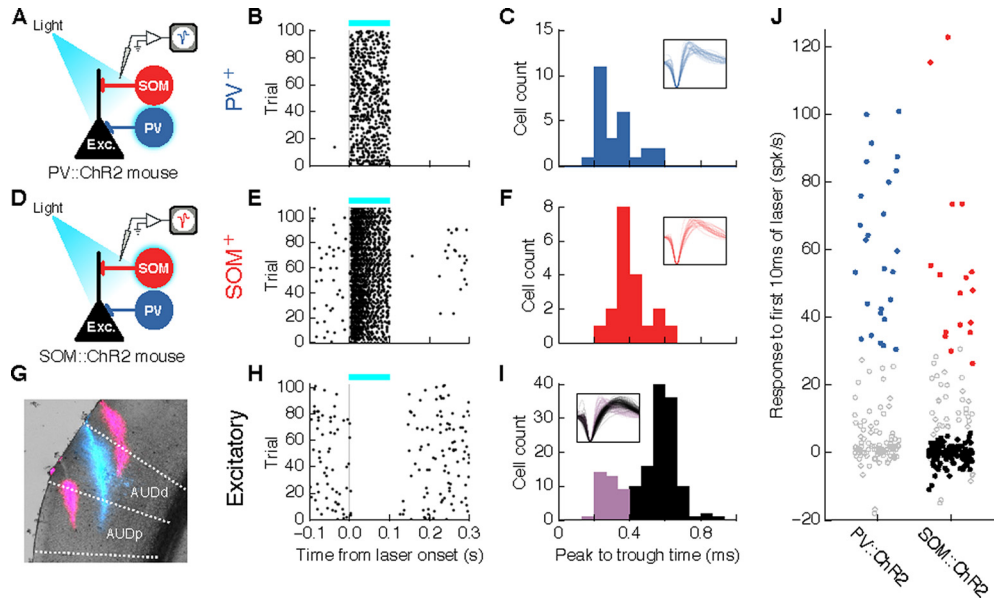

Figure 1.
