Authorship removal correction for 'The legacy effects of keystone individuals on collective behaviour scale to how long they remain within a group'

N. Pinter-Wollman

 NP-W, 0000-0002-0448-8037

Proc. R. Soc. B **282**, 20151766. (Published 7 September 2015) (doi:10.1098/rspb.2015.1766)

Due to recently discovered anomalies in the data collected and curated by J. N. Pruitt for the paper by J. N. Pruitt and N. Pinter-Wollman, 'The legacy effects of keystone individuals on collective behaviour scale to how long they remain within a group' published in 2015 in the *Proceedings of the Royal Society B* **282**, 20151766, which include formulas in the raw data file, duplication of portions of the data and an excessively high number of repeated values beyond what would be expected in an unbiased sample, N. Pinter-Wollman removes her authorship from this paper.
