Retraction: Inhibition of histone deacetylase activity promotes invasion of human cancer cells through activation of urokinase plasminogen activator.

Sai Murali Krishna Pulukuri, Bharathi Gorantla, and Jasti S. Rao

This article has been retracted by the publisher. None of the authors could be reached for comment. The *last three lanes* of the actin panel from SK-N-AS cells in Fig. 2*B* were reused in the *first three lanes* of the HDAC1 panel in Fig. 7*A*. In Fig. 6*A*, the HDAC5 and HDAC7 immunoblots are the same. A portion of the input panel from Fig. 6*B* was reused in the input panel for siHDAC1 in Fig. 7*B*.
