(iScience 23, 101496-1–101496-22; September 25, 2020)

Due to an oversight, Dr. Leonidas Arvanitis's name was omitted from the author list in the original publication. Dr. Arvanitis helped with assessing the needle biopsies and tumor sections for the tumor content and picked the cases for the core laboratory to stain. The authors apologize for this oversight, and the error has since been corrected.
