► This corrects the article “Pro-inflammatory Cytokine Levels and Cancer-related Fatigue in Breast Cancer Survivors: Effects of an Exercise Adherence Program” in volume 23 on page 205.

This corrects the article “Pro-inflammatory Cytokine Levels and Cancer-related Fatigue in Breast Cancer Survivors: Effects of an Exercise Adherence Program” in volume 23(2) on page 205.

This article was initially published with an error in some numerical values and % values of the “endocrine therapy” item in Table 1. And also, ‘About half of the participants (45%)’ in Line 4 on page 211 should be corrected to ‘More than half of the participants (55%).’ The authors apologize for any inconvenience that this may have caused.

### Corrected Table 1 (Next page)

#### Corrected sentence

In page 211, 3th line: More than half of the participants (55%) had undergone or were currently undergoing endocrine therapy (**Table 1**).

**Table 1.** Demographics and clinical characteristics

Parameter	Exp. (n = 19)	Cont. (n = 21)	$\chi^2$ or t (p value)
