

## CORRIGENDUM

# Corrigendum: Structure and functions of angiotensinogen

Hong Lu, Lisa A Cassis, Craig W Vander Kooi and Alan Daugherty

*Hypertension Research* (2016) **39**, 827; doi:10.1038/hr.2016.106

**Correction to:** *Hypertension Research* (2016) **39**, 492–500; doi:10.1038/hr.2016.17

After publication of this article, the authors noticed some amino-acid sequences of angiotensin II (Figure 2) were incorrect. The revised Figure 2 provides the correct amino-acid sequences.

Species	Sequence of AngII
Human	DRVYIHPF
Orangutan	DRVYIHPF
Mouse	DRVYIHPF
Rat	DRVYIHPF
Horse	DRVYIHPF
Cow	DRVY <u>V</u> HPF
Guinea Pig	DRVYIHPF
Chicken	DRVY <u>V</u> HPF
Three-toed Amphiumas	DRVY <u>V</u> HPF
Alligator	DRVYIHPF
Horn Fly	DRVYIHPF
Zebra Fish	<u>N</u> RVY <u>V</u> HPF
Silver Sea Bream	<u>N</u> RVYIHPF

**Figure 2** Sequence conservation of AngII across species. Letters with underline represent amino acids that are different from human AngII. AngII, angiotensin II.
