

## The Catalogue of Journal of Sport and Health Science 2020

2095-2546/© 2020 Published by Elsevier B.V. on behalf of Shanghai University of Sport. This is an open access article under the CC BY-NC-ND license (<http://creativecommons.org/licenses/by-nc-nd/4.0/>).

### Special Topics

#### **Special topic on School-based physical activity and wellness**

The pulse of recent research on school-based physical activity and wellness

*Senlin Chen, Richard R. Rosenkranz* . . . . . p. 1–2

A mixed-studies systematic review and meta-analysis of school-based interventions to promote physical activity and/or reduce sedentary time in children

*Michelle Jones, Emmanuel Defever, Ayland Letsinger, James Steele, Kelly A Mackintosh* . . . . . p. 3–17

The potential of a year-round school calendar for maintaining children's weight status and fitness: Preliminary outcomes from a natural experiment

*R. Glenn Weaver, Ethan Hunt, Aaron Rafferty, Michael W. Beets, Keith Brazendale, Gabrielle Turner-McGrievy, Russell R. Pate, Alberto Maydeu-Olivares, Brian Saelens, Shawn Youngstedt* . . . . . p. 18–27

Adolescents' perspectives on a school-based physical activity intervention: A mixed method study

*Stephanie T. Jong, Caroline H.D. Croxson, Cornelia Guell, Emma R. Lawlor, Campbell Foubister, Helen E. Brown, Emma K. Wells, Paul Wilkinson, Anna Vignoles, Esther M.F. van Sluijs, Kirsten Corder* . . . . . p. 28–40

Implementing physically active learning: Future directions for research, policy, and practice

*Andy Daly-Smith, Thomas Quarmby, Victoria S. J. Archbold, Ash C. Routen, Jade L. Morris, Catherine Gammon, John B. Bartholomew, Geir Kåre Resaland, Bryn Llewellyn, Richard Allman, Henry Dorling* . . . . . p. 41–49

What do teachers see? Perceptions of school-time physical activity programs on student behavior

*Jennifer M. Sacheck, Catherine M. Wright* . . . . . p. 50–52

#### **Special Topic on Obesity, exercise, and the gut microbiota**

Reflections on obesity, exercise, and musculoskeletal health

*Walter Herzog* . . . . . p. 108–109

Gut microbiota and obesity: Impact of antibiotics and prebiotics and potential for musculoskeletal health

*Teja Klancic, Raylene A. Reimer* . . . . . p. 110–118

Correlation network analysis shows divergent effects of a long-term, high-fat diet and exercise on early stage osteoarthritis phenotypes in mice

*Timothy M. Griffin, Albert Batushansky, Joanna Hudson, Erika Barboza Prado Lopes* . . . . . p. 119–131

Impact of age on host responses to diet-induced obesity: Development of joint damage and metabolic set points

*Kelsey H. Collins, Graham Z. MacDonald, David A. Hart, Ruth A. Seerattan, Jaqueline L. Rios, Raylene A. Reimer, Walter Herzog* . . . . . p. 132–139

Effects of obesity on breast size, thoracic spine structure and function, upper torso musculoskeletal pain and physical activity in women

*Julie R. Steele, Celeste E. Coltman, Deirdre E. McGhee* . . . . . p. 140–148

#### **Special topic on Physical activity during the COVID-19 global pandemic**

Physical activity during the coronavirus disease-2019 global pandemic

*Barbara E. Ainsworth, Fuzhong Li* . . . . . p. 291–292

Coronavirus disease-2019: A tocsin to our aging, unfit, corpulent, and immunodeficient society

*David C. Nieman* . . . . . p. 293–301

Projecting the impact of the coronavirus disease-2019 pandemic on childhood obesity in the United States: A microsimulation model

*Ruopeng An* . . . . . p. 302–312

Canadian children's and youth's adherence to the 24-h movement guidelines during the COVID-19 pandemic: A decision tree analysis

*Michelle D. Guerrero, Leigh M. Vanderloo, Ryan E. Rhodes, Guy Faulkner, Sarah A. Moore, Mark S. Tremblay* . . . p. 313–321

Returning Chinese school-aged children and adolescents to physical activity in the wake of COVID-19: Actions and precautions  
*Peijie Chen, Lijuan Mao, George P. Nassis, Peter Harmer, Barbara E. Ainsworth, Fuzhong Li*. . . . . p. 322–324

Physical activity recommendations during the coronavirus disease-2019 virus outbreak

*Gregor Jurak, Shawnda A. Morrison, Bojan Leskošek, Marjeta Kovač, Vedran Hadžić, Janez Vodičar, Polonca Truden, Gregor Starc*. . . . . p. 325–327

An international physical activity and public health research agenda to inform coronavirus disease-2019 policies and practices  
*James F. Sallis, Deepti Adlakha, Adewale Oyeyemi, Deborah Salvo*. . . . . p. 328–334

### **Special topic on Exercise and oxidative stress**

Introduction to special topic on exercise and oxidative stress  
*Zsolt Radak, Scott K. Powers*. . . . . p. 385

The role of mitochondria in redox signaling of muscle homeostasis  
*Li Li Ji, Dongwook Yeo, Chounghun Kang, Tianou Zhang*. . . . . p. 386–393

Physical exercise in the prevention and treatment of Alzheimer's disease

*Adrian De la Rosa, Gloria Olaso-Gonzalez, Coralie Archagnaud, Fernando Millan, Andrea Salvador-Pascual, Consolacion García-Lucerga, Cristina Blasco-Lafarga, Esther Garcia-Dominguez, Aitor Carretero, Angela G. Correias, Jose Viña, Mari Carmen Gomez-Cabrera*. . . . . p. 394–404

The roles of microRNA in redox metabolism and exercise-mediated adaptation

*Ferenc Torma, Zoltan Gombos, Matyas Jokai, Istvan Berkes, Masaki Takeda, Tatsuya Mimura, Zsolt Radak, Ferenc Gyori*. . . . . p. 405–414

Exercise-induced oxidative stress: Friend or foe?  
*Scott K. Powers, Rafael Deminice, Mustafa Ozdemir, Toshinori Yoshihara, Matthew P. Bomkamp, Hayden Hyatt*. . . . . p. 415–425

### **Regular Papers**

#### **Interview**

Should, and how can, exercise be done during a coronavirus outbreak? An interview with Dr. Jeffrey A. Woods  
*Weimo Zhu*. . . . . p. 105–107

#### **Letters**

Reply to “Is physical performance (in mice) increased by *Veillonella atypica* or decreased by *Lactobacillus bulgaricus*?”  
*Aleksandar D. Kostic*. . . . . p. 201–202

Team sport, power, and combat athletes are at high genetic risk for coronavirus disease-2019 severity

*Ildus I. Ahmetov, Oleg V. Borisov, Ekaterina A. Semenova, Oleg N. Andryushchenko, Liliya B. Andryushchenko, Edward V. Generozov, Craig Pickering*. . . . . p. 430–431

The bold sedentary behavior recommendations in the new Canadian guidelines: are they evidence-based? Response to “Sedentary Behavior Research Network members support new Canadian 24-Hour Movement Guideline recommendations”  
*Emmanuel Stamatakis, Adrian E. Bauman*. . . . . p. 482–484

### **Opinions**

Coronavirus disease (COVID-19): The need to maintain regular physical activity while taking precautions

*Peijie Chen, Lijuan Mao, George P. Nassis, Peter Harmer, Barbara E. Ainsworth, Fuzhong Li*. . . . . p. 103–104

Why have youth physical activity trends flatlined in the last decade? Opinion piece on “Global trends in insufficient physical activity among adolescents: a pooled analysis of 298 population-based surveys with 1.6 million participants” by Guthold et al.

*Greet Cardon, Jo Salmon*. . . . . p. 335–338

Epidemic-specific social capital and its impact on physical activity and health status

*Yanjie Bian*. . . . . p. 426–429

Linking Esports to health risks and benefits: Current knowledge and future research needs

*Keyi Yin, Yahua Zi, Wei Zhuang, Yang Gao, Yao Tong, Linjie Song, Yu Liu*. . . . . p. 485–488

Are we really “screening” movement? The role of assessing movement quality in exercise settings

*Hunter Bennett, John Arnold, Kevin Norton, Kade Davison*. . . . . p. 489–492

### **Commentaries**

A clash of fundamental assumptions: Can/should we measure physical literacy?

*Ang Chen*. . . . . p. 149–151

Is physical performance (in mice) increased by *Veillonella atypica* or decreased by *Lactobacillus bulgaricus*?

*Manuel Fernández-Sanjurjo, Javier Fernández, Cristina Tomás-Zapico, Benjamín Fernández-García, Claudio J. Villar, Felipe Lombó, Eduardo Iglesias-Gutiérrez*. . . . . p. 197–200

Commentary on “The tortuous path of lactate shuttle discovery: From cinders and boards to the lab and ICU”

*Scott K. Powers*. . . . . p. 461

Sedentary Behavior Research Network members support new Canadian 24-Hour Movement Guideline recommendations

*Mark S. Tremblay, Scott Rollo, Travis J. Saunders*. . . . . p. 479–481

### **Reviews**

Impacts of exercise interventions on different diseases and organ functions in mice

*Shanshan Guo, Yiru Huang, Yan Zhang, He Huang, Shangyu Hong, Tiemin Liu*. . . . . p. 53–73

Updated overview on interplay between physical exercise, neurotrophins, and cognitive function in humans

*Giuseppe Lippi, Camilla Mattiuzzi, Fabian Sanchis-Gomar*. . . . . p. 74–81

Effects of blood flow restriction without additional exercise on strength reductions and muscular atrophy following immobilization: A systematic review

*Mikhail Santos Cerqueira, José Diego Sales Do Nascimento, Daniel Germano Maciel, Jean Artur Mendonça Barboza, Wouber Héricksen De Brito Vieira*. . . . . p. 152–159

- Exercise-mediated regulation of autophagy in the cardiovascular system  
*Lijun Wang, Jiaqi Wang, Dragos Cretoiu, Guoping Li, Junjie Xiao*..... p. 203–210
- Impacts of exercise intervention on various diseases in rats  
*Ruwen Wang, Haili Tian, Dandan Guo, Qianqian Tian, Tingyao, Xingxing Kong*..... p. 211–227
- Exercise immunology: Future directions  
*David C. Nieman, Brandt D. Pence*..... p. 432–445
- The tortuous path of lactate shuttle discovery: From cinders and boards to the lab and ICU  
*George A. Brooks*..... p. 446–460
- The whole day matters: Understanding 24-hour movement guideline adherence and relationships with health indicators across the lifespan  
*Scott Rollo, Olga Antsygina, Mark S. Tremblay*... p. 493–510
- Application of network meta-analysis in the field of physical activity and health promotion  
*Xiwen Su, Daniel J. McDonough, Haitao Chu, Minghui Quan, Zan Gao*..... p. 511–520
- Walking pace and the risk of stroke: a meta-analysis of prospective cohort studies  
*Minghui Quan, Pengcheng Xun, Ru Wang, Ka He, Peijie Chen*..... p. 521–529
- Reasons why older adults play sport: A systematic review  
*Brad J. Stenner, Jonathan D. Buckley, Amber D. Mosewich*..... p. 530–541
- Association between fundamental motor skills and physical activity in the early years: A systematic review and meta-analysis  
*Dan Jones, Alison Innerd, Emma L. Giles, Liane B. Azevedo*..... p. 542–552
- Effect of citrulline on post-exercise rating of perceived exertion, muscle soreness, and blood lactate levels: A systematic review and meta-analysis  
*Hye ChangRhim, SungJong Kim, Jewel Park, Ki-MoJang*..... p. 553–561
- Does exercise have a protective effect on cognitive function under hypoxia? A systematic review with meta-analysis  
*Myungjin Jung, Liye Zou, Jane JieYu, Seungho Ryu, Zhaowei Kong, Lin Yang, Minsoo Kang, Jingyuan Lin, Hong Li, Lee Smith, Paul D.Loprinzi*..... p. 562–577
- Original articles**
- Exercise induces tissue hypoxia and HIF-1 $\alpha$  redistribution in the small intestine  
*Die Wu, Wei Cao, Dao Xiang, Yi-Ping Hu, Beibei Luo, Peijie Chen*..... p. 82–89
- Modeling the dose–response rate/associations between VO<sub>2max</sub> and self-reported Physical Activity Questionnaire in children and adolescents  
*Alan M. Nevill, Michael J. Duncan, Gavin Sandercock*.... p. 90–95
- The relationship between pain and associated characteristics of chronic ankle instability: A retrospective study  
*Saeed Al Adal, Martin Mackey, Fereshteh Pourkazemi, Claire E. Hiller*..... p. 96–101
- Analysis of doping control test results in individual and team sports from 2003 to 2015  
*Millán Aguilar-Navarro, Jesús Muñoz-Guerra, María del Mar Plara, Juan Del Coso*..... p. 160–169
- Physical activity levels in American and Japanese men from the ERA-JUMP Study and associations with metabolic syndrome  
*Naoko Sagawa, Bonny Rockette-Wagner, Koichiro Azuma, Hirotsugu Ueshima, Takashi Hisamatsu, Tomoko Takamiya, Aiman El-Saed, Katsuyuki Miura, Andrea Kriska, Akira Sekikawa*..... p. 170–178
- Segmented sedentary time and physical activity patterns throughout the week from wrist-worn ActiGraph GT3X+ accelerometers among children 7–12 years old  
*Gillian McLellan, Rosie Arthur, Samantha Donnelly, Duncan S. Buchan*..... p. 179–188
- Social correlates of sedentary behavior in young people: The UP&DOWN study  
*Verónica Cabanas-Sánchez, Laura García-Cervantes, Laura Esteban-Gonzalo, María José Girela-Rejón, JoséCastro-Piñero, Óscar L. Veiga*..... p. 189–196
- An evaluation of prevention initiatives by 53 national anti-doping organizations: Achievements and limitations  
*Katharina Gatterer, Matthias Gumpenberger, Marie Overbye, Bernhard Streicher, Wolfgang Schobersberger, Cornelia Blank*..... p. 228–239
- Costs resulting from nonprofessional soccer injuries in Switzerland: A detailed analysis  
*Angela Gebert, Markus Gerber, Uwe Pühse, Philippe Gassmann, Hanspeter Stamm, Markus Lamprecht*..... p. 240–247
- Transition to forefoot strike reduces load rates more effectively than altered cadence  
*Erin E. Futrell, K. Douglas Gross, Darcy Reisman, David R. Mullineaux, Irene S. Davis*..... p. 248–257
- Increased Q-Factor increases frontal-plane knee joint loading in stationary cycling  
*Tanner Thorsen, Kelley Strohacker, Joshua T. Weinhandl, Songning Zhang*..... p. 258–264
- Longitudinal associations of physical activity and pubertal development with academic achievement in adolescents  
*Eero A. Haapala, Henna L. Haapala, Heidi Syväoja, Tuija H. Tammelin, Taija Finni, Noona Kiuru*... p. 265–273
- Land-walking vs. water-walking interventions in older adults: Effects on aerobic fitness  
*Andrew Haynes, Louise H. Naylor, Howard H. Carter, Angela L. Spence, Elisa Robey, Kay L. Cox, Barbara A. Maslen, Nicola T. Lautenschlager, Nicola D. Ridgers, Daniel J. Green*..... p. 274–282
- Muscle strength cut-offs for the detection of metabolic syndrome in a nonrepresentative sample of collegiate students from Colombia  
*Antonio Garcia-Hermoso, Alejandra Tordecilla-Sanders, Jorge Enrique Correa-Bautista, Mark D. Peterson, Mikel Izquierdo, Aura Cristina Quino-Ávila, Carolina Sandoval-Cuellar, Katherine González-Ruiz, Robinson Ramírez-Vélez*..... p. 283–290

- Egocentric social network correlates of physical activity  
*Sonja Mötteli, Simone Dohle*. . . . . p. 339–344
- Validity of long-term and short-term recall of occupational sitting time in Finnish and Chinese office workers  
*Ying Gao, Neil J. Cronin, Nina Nevala, Taija Finni*. . . . . p. 345–351
- Validation and adaptation of the Physical Activity Enjoyment Scale (PACES) in fitness group exercisers  
*Pedro Teques, Luís Calmeiro, Carlos Silva, Carla Borrego*. . . . . p. 352–357
- Sport burnout inventory—Dual career form for student-athletes: Assessing validity and reliability in a Finnish sample of adolescent athletes  
*Matilda Sorkkila, Tatiana V. Ryba, Kaisa Aunola, Harri Selänne, Katariina Salmela-Aro*. . . . . p. 358–366
- Longitudinal trajectories of athlete burnout among young table tennis players: A 3-wave study  
*Guillaume Martinent, Benoît Louvet, Jean-Claude Decret*. . . . . p. 367–375
- Former athletes' lifestyle and self-definition changes after retirement from sports  
*Pierre-Luc Yao, Louis Laurencelle, François Trudeau*. . . . . p. 376–383
- Motivational processes in physical education and objectively measured physical activity among adolescents  
*Hanna Kalajas-Tilga, Andre Koka, Vello Hein, Henri Tilga, Lennart Raudsepp*. . . . . p. 462–471
- Regular moderate aerobic exercise improves high-fat diet-induced nonalcoholic fatty liver disease via monoacylglycerol O-acyltransferase 1 pathway suppression  
*Kyung-Wan Baek, Jeong-An Gim, Jung-Jun Park*. . . . . p. 472–478
- The influence of core affect on cyclo-ergometer endurance performance: Effects on performance outcomes and perceived exertion  
*Selenia di Fronso, Antonio Aquino, Réka Zsanett Bondár, Cristina Montesano, Claudio Robazza, Maurizio Bertollo*. . . . . p. 578–586
- Visual function, performance, and processing of basketball players vs. sedentary individuals  
*Jesús Vera, Raimundo Jiménez, David Cárdenas, Beatriz Redondo, José Antonio García*. . . . . p. 587–594
- Does endurance training improve red blood cell aging and hemorheology in moderate-trained healthy individuals?  
*Daniel A. Bizjak, Fabian Tomschi, Gunnar Bales, Elie Nader, Marc Romana, Philippe Connes, Wilhelm Bloch, Marijke Grau*. . . . . p. 595–603
- Affective responses to supervised 10-week programs of resistance exercise in older adults  
*Darren L. Richardson, Michael J. Duncan, Alfonso Jimenez, Paul M. Juris, Neil D. Clarke*. . . . . p. 604–613
- Morphological changes of the lateral abdominal muscles in adolescent soccer players with low back pain: A prospective cohort study  
*Pawel Linek, Pardis Noormohammadpour, Mohammad Ali Mansournia, Tomasz Wolny, Damian Sikora*. . . . . p. 614–619
- Effectiveness and time-course adaptation of resistance training vs. plyometric training in prepubertal soccer players  
*Yassine Negra, Helmi Chaabene, Thomas Stöggel, Mehréz Hammami, Mohamed Souhail Chelly, Younés Hachana*. . . . . p. 620–627
- Application of the neuromuscular fatigue threshold treadmill test to muscles of the quadriceps and hamstrings  
*Clayton L. Camic, Attila J. Kovacs, Trisha A. VanDusseldorp, Ethan C. Hill, Evan A. Enquist*. . . . . p. 628–633
- Relationship between abdominal adiposity, cardiovascular fitness, and biomarkers of cardiovascular risk in British adolescents  
*Moirra S. Lewitt, Julien S. Baker*. . . . . p. 634–644
- Responses to oral glucose challenge differ by physical activity volume and intensity: A pilot study  
*Trevor N. Simper, Cecile Morris, Anthony Lynn, Ciara O'Hagan, Karen Kilner*. . . . . p. 645–650
- Walking-friendly built environments and objectively measured physical function in older adults  
*Mohammad Javad Koohsari, Gavin R. McCormack, Tomoki Nakaya, Ai Shibata, Kaori Ishii, Akitomo Yasunaga, Yung Liao, Koichiro Oka*. . . . . p. 651–656
- Habitual physical activity levels and sedentary time of children in different childcare arrangements from a nationally representative sample of Canadian preschoolers  
*Julie Statler, Piotr Wilk, Brian W. Timmons, Rachel Colley, Patricia Tucker*. . . . . p. 657–663
- Health-related fitness knowledge growth in middle school years: Individual- and school-level correlates  
*Xihe Zhu, Justin A. Haegele, Haichun Sun*. . . . . p. 664–669
- Residual force enhancement due to active muscle lengthening allows similar reductions in neuromuscular activation during position- and force-control tasks  
*Rhiannon Marion, Geoffrey A. Power*. . . . . p. 670–676
- Postural control quantification in minimally and moderately impaired persons with multiple sclerosis: The reliability of a posturographic test and its relationships with functional ability  
*David Barbado, Ramon Gomez-Illan, Pedro Moreno-Navarro, Gregori Valero-Conesa, Raul Reina, Francisco J. Vera-Garci*. . . . . p. 677–684
- Effects of compression garments on surface EMG and physiological responses during and after distance running  
*Wei-Chun Hsu, Li-Wen Tseng, Fu-Chun Chen, Li-Chu Wang, Wen-Wen Yang, Yi-Jia Lin, Chiang Liu*. . . . . p. 685–691
- Isokinetic trunk flexion—extension protocol to assess trunk muscle strength and endurance: Reliability, learning effect, and sex differences  
*María Pilar García-Vaquero, David Barbado, Casto Juan-Recio, Alejandro, López-Valenciano, Francisco J. Vera-García*. . . . . p. 692–701
