1. There is an error in the title. The correct title of the article [1] is “Survival and Estimation of Direct Medical Costs of Hospitalized COVID-19 Patients in the Kingdom of Saudi Arabia”. We apologize for this error and state that the scientific conclusions are unaffected. The original article has been updated.
2. There is a typo mistake in the abstract’s conclusion where “is” which follows “represents” should be deleted so that the sentence can be grammatically correct, as highlighted in the following text: “Conclusion: The high hospitalization costs for COVID-19 patients represents **is** a significant public health challenge. Efficient allocation of healthcare resources cannot be emphasized enough.”

The authors would like to apologize for any inconvenience caused to the readers by these changes.
