Corrigendum to: Phylogenetics Identifies Two Eumetazoan TRPM Clades and an Eighth TRP Family, TRP Soromelastatin (TRPS)

Nathaniel J. Himmel, Thomas R. Gray, and Daniel N. Cox

Mol. Biol. Evol. 37(7):2034–2044; doi:10.1093/molbev/msaa065

In the original publication we had erroneously stated: “This is not the case. Instead, these reconciled trees show that TRPM8 forms a sister clade to TRPM2, the former not containing any **nonvertebrate** sequences, and the latter containing **vertebrate and nonvertebrate** sequences.” This was the result of an oversight during editing, and should read: “. . . the former not containing any **non lobe-finned** sequences, and the latter containing **lobe-finned and non-lobe-finned** sequences.”
