

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

## Corrigendum to “Estimating aerosol transmission risk of SARS-CoV-2 in New York City public schools during reopening” [Environmental Research 195 (2021) 110805]

The authors regret that our declaration of competing interest was not included with the final version of our article. BP, LL, FM, and EAK declare no conflicts of interest. AMI is currently employed by Cardno ChemRisk, a consulting firm that provides scientific advice to the government, corporations, law firms, and various scientific/professional organizations. The firm has been engaged by numerous companies to

provide COVID-19-related toxicology, epidemiology, industrial hygiene, and health and safety advice. The time invested by AMI to write this paper was provided by his employer.

The authors would like to apologize for any inconvenience caused.
