Retraction to: Exp Brain Res (2017) 235:2125-2131 https://doi.org/10.1007/s00221-017-4957-9

The Editors-in-Chief have retracted this original article following an investigation by Universiteit Leiden providing evidence of manipulated data. The investigation concluded that the authors originally tested 88 participants but only data of 40 participants was included in the analysis, without adequate or transparent explanation in the article why participants were excluded from the analysis.

L. Steenbergen and R. Sellaro agree to this retraction, L. Colzato does not agree to this retraction.

Publisher's Note Springer Nature remains neutral with regard to jurisdictional claims in published maps and institutional affiliations.

The original article can be found online at https://doi.org/10.1007/s00221-017-4957-9.
