Delayed Clinical Manifestation of Parkinson's Disease Among Physically Active: Do Participants in a Long-Distance Ski Race Have a Motor Reserve?

Tomas T. Olsson, Martina Svensson, Ulf Hållmarker, Stefan James and Tomas Deierborg

Pre-press 3 July 2020

[*Journal of Parkinson's Disease*, **10**(1) (2020), 267-274, DOI 10.3233/JPD-191762]
<https://content.iospress.com/articles/journal-of-parkinsons-disease/jpd191762>

In Figs. 2–5 of the original publication, the y-axes (showing cumulative incidence) in the graphs display one decimal higher than they should (e.g. 0.01 should instead be 0.001). These mistakes do not change the relative difference in risk of Parkinson's disease between the skiers and non-skiers and it does not change the conclusions made in the study.
